Colorado-based reVision, an IT solutions provider and consulting firm, is in a major deal with storage area networking provider Brocade Communications for a Department of Defense (DoD) data consolidation deal. Brocade said Thursday that it is partnering with reVision to provide the US DoD with a multi-petabyte storage infrastructure project using storage area networking (SAN) technology. The DoD's "Meta SAN" will include over 17,000 switch ports. Financial terms of the deal were not disclosed.
